

HARSHAD KALANTRI

Software Development Engineer | Technical Consultant

+91-8801008285 @ harshadkalantri@gmail.com [Linkedin - Harshad Kalantri](#) Hyderabad, India

SUMMARY

Software Development Engineer with 4.5 years of experience in backend service development and technical consulting, expert in Java/Spring and data parsing. My key achievements include enhancing adapter software quality performance by 65% and supervising Docker integration to reduce development cycles by 30%. Seeking a Software Developer position where I bring my backend service development and CI/CD skills to support your mission of delivering robust and secure applications through innovation and excellence.

EXPERIENCE

Software Engineer

MYCOM OSI

10/2021 - Present Gurgaon, India

MYCOM OSI provides software for network assurance, automation, and analytics, boosting telecom performance and reliability.

- Core and advanced Java expertise in executing and building high-performance parsers and processors that enhanced adapter software quality performance by 65%.
- Design and implement ETL workflows with SQL, including queries, stored procedures, and performance tuning to transform, validate, and analyze data.
- Develop standalone internal tools such as CLI, desktop, and web utilities to automate workflows, improve developer productivity, and enhance operational reliability improving scalability by 35%.
- Containerize Java services using Docker for consistent, repeatable, and secure deployments across various environments.
- Apply multithreading, concurrency, JVM tuning, and memory management techniques to reduce latency and increase throughput.
- Build and maintain REST APIs and integration adapters, ensuring reliability through unit and integration tests as well as CI/CD pipelines.
- Collaborate and Troubleshoot cross-functionally with Product, QA, and Ops teams to deliver production-ready components with clean, testable code and comprehensive documentation.

Technical Consultant

Azri Consultancy

08/2019 - 07/2020 Hyderabad, India

- Produced 25+ articles demystifying technology applications for social good, enabling non-technical stakeholders to leverage apps for community impact.
- Created technical documentation for enterprise applications serving major organizations and NGOs, translating complex concepts into clear, user-focused materials.
- Documented software features, API integrations, and implementations with development teams to enhance organizational efficiency and social impact.
- Maintained technical content across multiple platforms, ensuring accuracy and consistency for community-driven technology initiatives.
- Created technical content bridging engineering teams and end-users, improving adoption of emerging technologies and product advancement strategies.

SKILLS

Java	Git	SQL	Data Parsing
Software Development Lifecycle			DSA
CSV Parsing		OOP	Collections
Streams	Generics	Jenkins	
Agile/Scrum		Multithreading	
Concurrency		Thread Safety	
JVM Tuning		Memory Management	
Exception Handling		JSON/XML Parsing	
ETL	Internal Tools Development		
Docker Containerization			Microservices
REST APIs		CI/CD	Maven/Gradle
JUnit	Linux	Troubleshooting	
AWS	Your Skill		

KEY ACHIEVEMENTS

Upgraded IAR Scanner Analysis Application performance.

Spearheaded the development of IAR Scanner application, leading to an 80% improvement in identifying properties and mechanisms of adapters.

Developed JSON Generic Parser

Developed a Generic JSON Parser capable of flattening, grouping, and hierarchically mapping complex multi-level JSON structures into structured database-ready records, improving performance by 45% over existing JSON parsers.

Supervised Successful Docker Integration

Successfully supervised moving data on servers to Docker Environment that shortened the development cycle for new software features by 30%.

Designed SNMP Counter Search and Management System

SNMP Counter Search tool is a centralized counters database that gives attributes and counter details from SNMP-based adapters.

EXPERIENCE

INSOFE

Technical Intern

INSOFE

01/2019 - 06/2019 Hyderabad, India

INSOFE was a premier data science and big data analytics institute that focuses on applied engineering education.

- Enhanced technical blog content on data science, machine learning, AI, big data, and data visualization for INSOFE, a Carnegie Mellon University-certified data science institute serving 3,000+ alumni and corporate clients globally.
- Authored technical articles on machine learning, statistical analysis, and big data for students and professionals.
- Contributed to INSOFE's thought leadership by researching and documenting emerging trends in AI and analytics, supporting the institution's mission to bridge the gap between academic theory and industry-applied data science.

EDUCATION

Bachelor of Technology in Computer Science

BML

09/2015 - 09/2019 Gurgaon, India

CERTIFICATIONS

Simplilearn Java Full Stack Certification

The Simplilearn Java Full Stack Certification trains learners in front-end and back-end development using Java, Spring Boot, and modern web technologies. It prepares participants to design, build, and deploy complete web applications professionally.

COURSES

E-Commerce Course - Java, Spring, Hibernate and MySQL

E-Commerce website using a step-by-step approach encompassing both front-end and back-end development, including design, implementation, and integration of core functionalities.

TakeUForward + Pinnacle Program

The Pinnacle Program is an all-in-one learning platform covering DSA, system design, core CS subjects and interview-ready company-wise problems to help you quickly grasp key concepts and tackle coding challenges

PROJECTS

Sporty Shoes

This is an E-Commerce website using Java Full Stack technologies. It's about building an online sports store.

INTERESTS

Exploring New Software Architectures

Passionate about researching and implementing modern software architectures to solve complex problems.

Appreciating Creative Storytelling

Enjoy exploring creative storytelling through manga and television series.

Avid Outdoor Enthusiast

Love discovering new places across India, enjoying nature, and maintaining a healthy balance between work and adventure.
